Society Has Simple Summer Diversion By MILDRED MARSHALL KOONCE.

WITH June slipping quietly away and taking with it the last vestiges of a social season, the Capital is turning its atten-June benefits have shared popular interest thus far, but with only one or two prominent weddings yet to be celebrated, the war charities will flourish unmolested. Of course, the arrival of the Russian and Belgian missions gave fresh impetus to official society, which has feted a series of interesting visitors this spring. For the first time since the outbreak of the European war made continental travel unprofitable, fortunate Americans with a foreign language at each finger tip were permitted an opportunity to converse in the soft, musical tongues of southern Europe.

The same round of hospitality which greeted the advent of the French, British and Italian missions has been arranged in honor of the distinguished Russians and Belgians. The President and Mrs. Wilson gave two brilliant dinners at the White House in compliment to the visitors, asking a representative company to meet them. Mrs.

Garden parties are such informal affairs as to escape the censure of the severest conception of what is fitting in the official life of a country at war and while Congress is in session, there is ample occasion for functions of varying degrees of formality. The season is never completely ended socially while the flags still flutter from the two

wings of the Capitol. The President and Mrs. Wilson find their only diversions in early morning games of golf and an ochorseback ride in the Park. On Sunday afternoons they frequently take a brief cruise on the Mayslower or a long motor-ride down the attractively shady roads of Maryland and Virginia. Attendance at a local theater perhaps once a week completes the simple diversions which the busy Chief Executive permits him-self in these hours of national stress. Cabinet members snatch an occasional day or two from their desks for a motor trip or a week-end visit at one of the handsome country estates that fringe the Potomac. Mr. and Mrs. Louis Hertle keep an open house of hospitality at Gunston Hall, enter-taining members of diplomatic and official society each week-end. TODAY'S AID TO BEAUTY

Hair is by far the most conspicu ous thing about us and is prob-ably the most easily damaged by bad or careless treatment. If we are very careful in hair washing, we will have virtually no hair troubles. An especially fine sham-poo for this weather, one that brings out all the natural beauty of the hair, that dissolves and entirely removes all dandruff, excess oil and dirt, can easily be used at trifling expense by simply dissolving a teaspoonful of canthrox (which you can get at any drug-gist's) in a cup of hot water. This makes a ful cup of shampoo liquid, enough so it is easy to apply it to all the hair instead of just the top of the head. This chemically dis-solves all impurities and creates a soothing, cooling lather. Rinsing leaves the scalp spotlessly clean, soft and pliant, while the hair takes on the glossy richness of natural color, also a fluffiness which makes it seem much heavier than it is After a canthrow share. than it is. She Will Fly Here from Buffalo for the Red Cross

Katherine Stinson is going to fly from Buffalo to Washington and carry with her a check for the first contribution given in Buffalo toward the Red Cross One Hundred Million Dollar War Fund.

She will stop along the route at various cities to take similar checks. At the end of the first day's flight she expects to land in New York City, where she will get probably the largest check of all.

Within forty-eight hours she will deliver these checks to the Secretary of the Treasury, Mr. McAdoo, on the steps of the Capitol Building in Washington. Miss Stinson will drive a new Curtiss aeroplane, on the lower wings of which two huse Red Crosses have been painted.

The daring young aviatrice has just completed a flying trip through the Orient, and the picture shows her just before starting a flight for the Red Cross in China.

The latter rendered Beethoven's "Sonate Pathetique" very effectively.

SIX-CENT FARES URGED.

SIX-CENT FARES URGED.

SIX-CENT FARES URGED.

For many years electric railway men have talked about the 6-cent city fare in somewhat the same way that mathematicians discuss the fourth dimension. It was of interest from a theoretical standpoint, problems based upon its use could be worked out mathematically, but it could not be visualised as actually in existence. The 6-cent fare is now disappearing from the category of imaginary quantities. It is emerging from its nebulous form and becoming concrete.

A few weeks ago the Electric Railway Journal commended the frank statement of President Brush, of the Boston (Mass.) Elevated Railway, to a legislative committee that the 6-cent fare must come as the ultimate solution of that city's transportation problem. In connection with the present situation in Philadelphia, Pa., the engineers of the city have referred to a 6-cent fare on the proposed high-speed system as one way of reducing the deficit from its construction. The 6-cent fare is also being talked of as a possibility in Albany and Rochester, N. Y.

Look Out for Automobile Gas.

Are you in the practice of "warming up" your automobile engine in the garage with the doors and windows closed? If so, you stand a good chance of being asphystated by the exhaust gases, warns the Popular Science Monthly. So imminent, indeed, is the danger, that the United States Bureau of Mines has sent out a warning against operating automobile engines in small garages where the ventilting facilities are poor.

According to the bureau the air in the garage is rendered decidedly dangerous after the automobile engine. Thought the force it will collect anywhere the ventilting facilities are poor.

The symptoms of carbon monoxide poisoning come almost without warning, says the report, and collapse in a garage generally proves fatal, unless outside aid argives very soon.
